

▼ INGREDIENTS

Supplement Facts		
Serving Size: 3 capsules		
Amount Per Serving		% Daily Value
Vitamin A	39,900 IU	800%
Vitamin C (Magnesium Ascorbate)	300 mg	500%
Vitamin E	180 IU	600%
Proprietary Blend	1,450 mg	*
<small>Rose Hips (Herb); Citrus Bioflavonoids; RNA/DNA Liver Tissue Factors; Paprika (Herb); Damiana (Leaves); Pedra Hume Caa (Leaves); RNA/DNA Thymus Tissue Factors; Acacia Gum; Hesperidin; RNA/DNA Spleen Tissue Factors; Peach (Bark); Echinacea Purpurea (Root); Sun Dew (Herb); Cassia Oil</small>		
*Daily Value is not established.		

Other Ingredients: Gelatin, Dextrose (Organic Grape) and Leucine

▼ DOSAGE

- Capsules: 1-3 capsules, up to twice per day for 1-2 months, or as directed.
- BioTincture (TACX) : ½ - 2 droppers, up the three times per day.
- Concentrated Extract (CXACX): 5 drops up to three times per day.

▼ PACKAGING

- Capsules: 60 capsules/eco-bottle.
- BioTincture (TACX): 1 oz. glass bottle with dropper.
- Concentrated Extract (CXACX): ½ oz. glass bottle with dropper.

▼ PERSPECTIVE

Body purification processes can often become overexuberant and overload the liver's capabilities. This can result in temporary aggravations called Herxheimer Reactions experienced as flare ups of skin rashes, fevers, headaches, which occur as part of the process. The concept of "drainage support" means to provide the body the nutrients it requires to perform its normal functions and not become overloaded and better engage its normal cellular purification processes.

▼ LIFESTYLE

#102 ACX (Vitamin DTX, capsules)

#1102 TACX (Vitamin DTX, tincture), #2102 CXACX (Vitamin DTX, concentrated extract)

Combines supportive nutrients to assist in the normal liver purification processes. A favorite of clinicians to help in providing overall drainage support to the patient.

▼ INDICATIONS

- General whole body purification process support
- Seasonal allergy support
- Drainage support for any program
- Nutritional liver support
- Winterizing – tonic for seasonal challenges
- Nutritional support for normal immune system functions

▼ KEY COMPONENTS

- **Vitamin A** – In the digestive tract and liver, Vitamin A plays a key role in the normal immune modulation processes and thus supports normal, balanced relationships between the body and the microbial kingdom.
- **Vitamin C** – Known as a vital antioxidant, Vitamin C plays a protective role in the cells regarding free radical activity and DNA maintenance. It's a first-line protective nutrient, as well as a chelator of xenobiotic compounds.
- **RNA/DNA Liver Tissue Factors** – Amino acid cellular identity factors for liver tissue integrity.
- **Citrus Bioflavonoids and Hesperidin** – Components accompanying the comprehensive Vitamin C molecule, they support collagen, comprise the normal protective cardiovascular processes, and support healthy immune activity. They increase the purification quotient of Vitamin C.
- **Vitamin E** – Antioxidant qualities; combines with oxygen and assists in neutralizing free radicals. Protects polyunsaturated fats and other oxygen-sensitive compounds such as vitamin A from being destroyed by damaging oxidation reactions.
- **Rose Hips** – Rich in Vitamin C and bioflavonoids; a natural source of nutrients for the body's normal vascular system maintenance.
- **RNA/DNA Spleen Tissue Factors** – Amino acid cellular identity factors for spleen tissue integrity and functional support.
- **Echinacea Purpurea** – Subject of many research studies, this herb has become famous for supporting normal healthy immune and respiratory processes.
- **Paprika** – Rich in carotenoids, plays a role in healthy cell development. Contains natural iron that supports cellular metabolism – allows cells to conduct chemical reactions such as electron transport chain for ATP energy production.
- **Damiana** – An herb with a history of supporting healthy digestion, nerves, circulation, and glucose metabolism.
- **RNA/DNA Thymus Tissue Factors** – Amino acid cellular identity factors for thymus tissue integrity, as well as an immune system support.

- **Pedra Hume Caa** – Leaves are astringent, high content of flavonoids, flavonols, and flavanones and supports normal glucose metabolic and ATP energy processes required for healthy cellular activities.
- **Acacia Gum Powder** – Aids in normal nutrient-absorption processes. Supports gut microbiota.
- **Peach Bark** – Supports normal blood and urinary purification processes. Supports circulation. In Traditional Chinese herbology, helps dispel blood stagnation.

▼ CONTRAINDICATIONS

None. Note: Contains a very rich supply of Vitamin A. Check other components of a comprehensive program for total Vitamin A amounts.

▼ CLINICIAN CONSENSUS

- Normal Purification Process Support:
 - #102 ACX - Vitamin Detox
 - #408 CLNZ - Chelator
 - #433 GCEL - Intracellular Glutathione
 - #180 REL - Chlorella
 - #404 BIND - Toxin Elimination

▼ BACKGROUND

Doc Wheelwright took two of his formulas, his ACP formula and a "Liver-x" formula that he developed to support healthy purification channels, left liver lobe support, and drainage support, and balanced them together to create ACX. Thus ACX is two formulas in one. ACX has been the premier drainage support formula for over 30 years.

▼ SYNERGISTIC CONSIDERATIONS

- #180 REL - Chlorella
- #408 CLNZ - Chelator
- #404 BIND - Toxin Elimination
- #433 GCEL - Intracellular Glutathione
- #850 MoRS - Methylation Donor
- #41 Gt - Thymus
- #128 CVO - Cardiovascular Oil
- #491/#492/#493/#494 VRM1-2-3-4
- #483 OXOX - Activator Cell
- #481 OXAA - Organizer Cell
- #482 OXCC - Cleanser Cell
- #402 ARTA - Jointez
- #60 L - Liver
- #62 Ls - Livers
