

▼ **INGREDIENTS**

Supplement Facts		
Serving Size: 2 capsules		
Amount Per Serving	% Daily Value	
Vitamin B6 (Pyridoxine HCl).....	1.9 mg	96%
Proprietary Blend.....	490 mg	
RNA/DNA Brain Tissue Factors; RNA/DNA Pituitary Tissue Factors; Peach (Bark); Rue (Root); Jaborandi (Leaves); RNA/DNA Orchic Tissue Factors; L-Methionine; Superoxide Dismutase		
*Daily Value Not Established		
Other Ingredients: Dextrose, Gelatin, Protein (Milk), Leucine and Vegetable Stearates.		

▼ **DOSAGE**

- 1-2 capsules, up to twice a day, for 1-3 months.
- Concentrated extract, CXGb (Pituitary/Pineal): 4-5 drops twice a day.

▼ **PACKAGING**

- 60 capsules/eco-bottle.
- Concentrated extract, CXGb: 1/2 oz. glass bottle with dropper.

▼ **PERSPECTIVE**

The brain's five glands are responsible for oversight on the entire endocrine function:

- Hypothalamus: Controls the autonomic nervous system, regulates homeostasis, and instructs the pituitary.
- Anterior pituitary: Produces, stores, and secretes the hormones prolactin, human growth hormones, melanocyte stimulating hormones, thyroid stimulating hormones, adrenocorticotrophic hormones, follicle stimulating hormones and luteinizing hormones.
- Posterior pituitary: Stores hormones from hypothalamus, such as the antidiuretic hormones and oxytocin.
- Intermediate pituitary: Secretes bioactive peptides.
- Pineal gland: Regulates circadian and other rhythms via melatonin.

▼ **LIFESTYLE**

#32 Gb (Pituitary/Pineal)

#2032 CXGb (Pituitary/Pineal)

Gb stands for "Glands/Brain". This formula provides nutritional support for the five "brain glands"- the hypothalamus, anterior pituitary, posterior pituitary, intermediate pituitary and pineal. The pituitary is considered "command central" for the entire endocrine system's balanced and normal regulation of the entire body's intricate hormonal processes.

▼ **INDICATIONS**

- Brain regulatory processes, mental clarity
- Thyroid/Adrenal comprehensive support
- Normal glucose metabolism
- Precision in normal hormone
- Mild head tension
- Positive mood support
- Menopause support
- Healthy libido support
- Menstrual cycle normal function
- Master endocrine system regulation - supports normal adrenal, thyroid, thymus and gonadal relationships.

▼ **KEY COMPONENTS**

- **RNA/DNA Pituitary Factors** - Nucleoproteins required for pituitary cell function identity.
- **Peach Bark** - Supports normal blood flow to the brain; a purifier.
- **Whey Protein** - Supports the pituitary's normal Human Growth Hormone (youthfulness) functions.
- **Superoxide Dismutase** - A cellular antioxidant that helps protect cells from the superoxide free radical generated by the mitochondria when making ATP energy.
- **Jaborandi** - A Brazilian herb known, in small amounts, to support normal healthy autonomic nerve functions throughout the body.
- **Vitamin B6 (Pyridoxine HCl)** - Directly supports the levels of pituitary hormones in circulation.
- **L-Methionine** - An essential amino acid required for normal metabolic function, cellular fat burning (beta oxidation), and normal cholesterol management. Provides sulfur, a necessary nutrient for cholesterol sulfate.

▼ **CONTRAINDICATIONS**

None known. While containing a number of therapeutic botanicals, Doc Wheelwright taught that combined herbal formula nutrients work synergistically, deriving the most benefit from small amounts of ingredients that enhance and support each other to gain beneficial impact.

▼ **CLINICIAN CONSENSUS**

- Basic Pituitary/Pineal Support:
 - #1** Activator
 - #32** Gb-Pituitary/Pineal
 - #854** Neurosyn
 - #406** CALM
 - #850** MoRS

▼ **BACKGROUND**

On request from practitioners who specialize in hormonal health, Doc Wheelwright designed this "Glands/Brain" (Gb – Pituitary/Pineal) formula to be compatible with his growing array of endocrine gland support formulas. In doing so, Doc attuned this formula bioenergetically to the brain's master endocrine functions. He pioneered the concept that the pituitary hormones were involved with three gland centers – anterior lobe, posterior lobe, and intermediate lobe – and thus provided practitioners with nutritional support factors to support normal growth, osmolarity, thyroid and adrenal function, healthy blood pressure, breast milk production, gonadal function, kidney function, sleep cycles, and the various aspects of master endocrine regulation.

▼ **SYNERGISTIC CONSIDERATIONS**

- **#1**-Activator
- **#2**-Builder
- **#12** B (Brain)
- **#50** I (Eyes)
- **#22** F+ Female+
- **#24** Fpms Female Health
- **#70** M+ Male Endocrine
- **#31** Ga-Adrenal
- **#39** Gf –Thyroid
- **#854** Neurosyn
- **#406** CALM
- **#850** MoRS
- **#870/872** Spectra1&2
- **#880/ 882** VISTA1&2
