

## **VINGREDIENTS**

# **▼ DOSAGE**

 1-2 capsules twice a day for 1-3 months, with or without food, or as directed.

## **V** PACKAGING

• 60 capsules/eco-bottle.

## **V PERSPECTIVE**

Cardiovascular tonics have been used for centuries to support normal heart health and vitality; and their efficacy has been proven in numerous clinical trials. Such trials focused on the nutrients that improve the strength of the heart muscle, reduce oxidative damage, normalize gene expression, and increase endurance. Heart health is founded on exercise, diet, and lifestyle; and supplements can improve the dietary aspect with targeted nutrition.

# **▼ LIFESTYLE**

# **#45 Hcv** (Heart/Cardiovascular)

Features tonic herbs targeting the blood vessel integrity - arteries, veins, and capillaries. While supporting normal blood purification processes, the primary focus is to support the body's normal vessel maintenance processes, e.g. the innate strengthening and repair faculties. Doc Wheelwright taught that this formula was unique in its botanical approach to vessel tissue integrity.

## **VINDICATIONS**

- Artery, vein, and capillary tissue integrity
- Botanical nutrients for the heart/cardiovascular system
- Normal tissue maintenance processes
- Support normal vessel elasticity
- Mild blood purification properties
- Drainage support for normal vascular transport of metabolic wastes

#### **▼ KEY COMPONENTS**

- Hawthorn Berries Nature's great heart and cardiovascular system tonic. An analysis of 39 research studies supports improved cardiovascular strength and performance.
- **Paprika** A popular condiment spice containing the essential compound, Capsaicin.
- RNA/DNA Heart Factors Supports the tissue integrity and genetic continuity via organized amino acids, peptides, and nucleoprotein structures..
- Cassia Bark Helps maintain normal blood viscosity, glucose, and lipid levels.
- Potassium Bitartrate Plant based potassium to help normal protective processes of the cardiovascular system, supports normal blood pressure, reduces salt sensitivity in hypertensives, and supports the heart's structural and mechanical functions.
- Stevia Mostly known as a safe sugar substitute, it has been shown to support the body's normal regulatory processes of HDL ratios, blood pressure, and heart performance.
- Sete Sangrias A traditional rain forest botanical with a wide range of benefits cited in Brazilian herbal texts.

# **▼ CONTRAINDICATIONS**

Contains hawthorn berries in a small amount. Hawthorn can make blood-thinning drugs, (Warfarin: Coumadin®, Jantoven®, generics) more effective if used in large doses—thus strengthens the effects beyond the Rx-dosage intent.

## **▼ CLINICIAN CONSENSUS**

• Basic Heart/Cardiovascular Support:

#45 Hcv - Heart Cardiovascular

#44 H - Heart

#46 HQ - Heart Energy

#128 CVO - Cardiovascular Oil

#840 EVENTA - Cellular Enzyme

# **▼ BACKGROUND**

This formula was inspired by a close friend of Doc Wheelwright's who passed away during chelation treatment for arterial plaque. Doc applied several unique concepts with the most controversial one being that arterial plaque was not, of itself, a disease process; but instead was the mechanism that the body uses to protect the arteries from springing a leak. This supplement was a first in the natural health industry that focused on the arteries, veins and capillaries as a "tissue" requiring nutrient support.

#### **V** SYNERGISTIC CONSIDERATIONS

- #620/#625/#630 Metabo-Shake Glycemic Support
- #875 Synulin Glycemic Balance
- #48 HQ Heart Energy
- #810 eNRG Quantum ATP
- #850 MoRS Methylation Donor
- #755 Fire Tonify Support the Heart
- #750 Fire Sedate Pacify The Spirit
- #785 Wood Tonify Tonify Blood
- #870/871, #872 Spectra One & Two Whole Food, Cellular, Multi Vitamin/Mineral/Fatty Acids
- #140 MIN Multi Mineral
- #184 ROX Super Antioxidant
- #197 OMGA Omega 3-6-9
- #129/199 VitD3 Vitamins D3/K2
- #128 CVO Cardiovascular Oil
- #840/841 EVENTA Cellular Enzyme
