| Supplement Facts         |               |
|--------------------------|---------------|
| Serving Size: 3 capsules |               |
| Amount Per Serving       | % Daily Value |
| Proprietary blend.....   | 1,450 mg *    |
| Black Walnut (Leaves)    |               |
| Wormseed (Herb)          |               |
| Kamala (Herb)            |               |
| Quassia Chips (Bark)     |               |
| Bromelain Enzyme         |               |
| Betel Nut                |               |

\* Daily Value not established.

Other ingredients: Cellulose and Lecithine

## ▼ DOSAGE

- 1-3 capsules at bedtime for 4-6 cycles of 15 days each (e.g. 10 days on, 5 days off), or as directed.
- Concentrated Extract: 3-5 drops, twice per day, for 4-6 cycles of 15 days each (e.g. 10 days on, 5 days off), or as directed.

## ▼ PACKAGING

- Capsules: 30 capsules/eco-bottle.
- Concentrated Extract: 1 oz. glass bottle with dropper.

## ▼ PERSPECTIVE

All herbal traditions, past and present, have botanical formulas to help the body when unwanted, parasitic life forms become unwanted guests in the GI Tract and in the body tissues. Substances that help expel such unwanted visitors are called vermifuges. Some species have been found to provide benefits, and many are considered parasitic in nature. In these many traditions, there are strategies for helping the body's normal immune relations with: 1) large species that can be seen with the unassisted eye (e.g. tapeworms), 2) small species that can be seen and that migrate around the body (roundworms), 3) microscopic species that attempt to infest the GI Tract (protozoa), and 4) microscopic species that migrate into tissues via the blood (microfilaria). The herbal varieties employed often support the body's normal immune processes to be vigilant, and often contain enzymes that encourage the body's natural expulsion of bothersome species. They help cleanse the terrain that supports uninvited guests. Rather than a "stun and kill" approach, the bioenergetic properties of herbs support the body's innate self-regulatory processes and the body's innate priorities.

## ▼ LIFESTYLE

## #492 VRM2 (Small)

### #2492 CXVRM2 (Small)

This herbal combination supports the body's normal and beneficial relationship with human parasitic organisms. Herbal phytoconstituents can help with healthy structural function interaction with small multicellular organisms that may occupy the human GI Tract.

## ▼ INDICATIONS

- Support normal relationships with parasitic organisms.

## ▼ KEY COMPONENTS

- **Black Walnut** – A very popular herb with a long history of assisting the body with its normal self-protective processes regarding many undesired influences. Contains the compound, Juglone.
- **Wormseed Oil** – *Chenopodium ambrosioides*. Botanical cited to help the body establish an environment that is inhospitable to harmful, invading organisms.
- **Kamala** – From the African and Austral-Asian, and Ayurvedic herbal traditions. Historic applications include support of normal intestinal functions and normal bowel peristalsis, and for skin cleansing.
- **Quassia Chips** – *Quassia amara*. A Jamaican herb/tree with a long history of supporting normal digestive and gastrointestinal activities. Contains the oil, quassin.
- **Bromelain** – Protein-digesting (proteolytic) enzyme complex, assists the body's own digestive mechanisms in reducing very large, complex protein molecules into smaller peptide units or individual amino acids.
- **Betel Nut** – Bing Lang. A palm fruit from the Traditional Chinese and Ayurvedic herbal traditions where it is used to assist the body's normal expulsive intestinal regulatory processes.

## ▼ CONTRAINDICATIONS

Generally none. Best avoided during pregnancy.

## ▼ CLINICIAN CONSENSUS

- Traditional Small Program:  
**#492 VRM2** - Small  
**#260 WO** - China Healing Oil

## ▼ BACKGROUND

Doc Wheelwright was a renowned parasitologist and traveled the world seeking solutions for various parasitic organisms that might become unwanted guests in the human body. Doc discovered several of the key ingredients for this formula in India and the Orient. The cycling of the formula follows the herbal tradition of addressing different facets of the organisms' life cycles. Doc found that smaller intestinal worms infestations cooperated better to a different combination of herbs than larger parasites, thus he individualized formulas to support the body's own natural methods of maintaining normal relations with invasive species.

## ▼ SYNERGISTIC CONSIDERATIONS

- **#491/#2491 VRM1** - Large
- **#493/#2493 VRM3** - Micro
- **#494/#2494 VRM4** - Cell
- **#260 WO** - China Healing Oil
- **#270 SC** - Cleanser
- **#402 ARTA** - JointEz
- **#101 ACP** - Vitamins ACP
- **#102/#1102/#2012 ACX** - Vitamin DTX
- **#200 AO** - Aloe Vera
- **#210 CA** - Cats-A-Tonic
- **#250/#254 TR** - Tai Ra Chi
- **#73 Mpr** - Prostate/Ovatum
