

▼ INGREDIENTS

Supplement Facts

Serving Size: 4 capsules

Amount Per Serving	% Daily Value
Magnesium (Oxide/Hydroxide).....235 mg	59%
Proprietary Blend.....	1,750 mg *
Baozene®; Apple Fiber; Activated Carbon; Humic Acid/Fulvic Acid; Cascara Sagrada (Herb); Dandelion (Root); Cinquefoil (Herb); Flax; Bacillus Coagulans	

* Daily Value is not established.

Other Ingredients: Gelatin and Leucine

▼ DOSAGE

- 2-4 capsules at bedtime for 1-3 months.

▼ PACKAGING

- Capsules: 120 capsules/eco-bottle.

▼ PERSPECTIVE

Records show that humans have used charcoal as a purifying agent for over 4000 years. Today, it is used in water purifiers, air purifiers, and in dietary supplements. Internal applications include it being a neutralizer for poison, dentifrice, absorber of gas (charcoal used to be called a "bowel sweetener") and help for microbial concerns.

▼ LIFESTYLE

#404 BIND (Toxin Elimination)

This formula provides charcoal in a "super activated" form which means that it has a huge surface due to its honeycomb structure. Featuring all the virtues of charcoal in a superior delivery system, super activated charcoal can absorb 300 times its molecular weight and thus is often used as a "drainage" support for what the gall bladder introduces to the intestines as well as for normal intestinal purification processes.

▼ INDICATIONS

- Intestinal purification support
- Reduce gas
- Bio-toxin cleansing from bowel
- Intestinal "drainage" support
- Intestinal heavy metal chelator
- Prevents retoxification
- Favorably impacts blood lipid distribution via binding the bile complex
- Helps abdominal bloating
- Food poisoning, chemical poisoning

▼ KEY COMPONENTS

- **Super-Activated Carbon** – Absorbs chemicals, microbial wastes, and heavy metals. Binds with toxins and prevents absorption and resorption into the body.
- **Magnesium** – Helps with normal cellular purification activities, energy production, nerve transmissions, and expulsion of toxins from deep tissues.
- **Humic Acid** – From organic plant source, works with the body's mineral processes and immunological balance.
- **Fulvic Acid** – A humate from organic plant source. A nutrient similar to a vitamin that supports the body's normal cellular health and function via electrolytes and minerals for various life processes.
- **Baozene** – A remarkable fiber, rich in antioxidant nutrients, from the Baobab tree. Rich in minerals and probiotic fibers.
- **Cascara Sagrada** – Contains anthraquinone compounds that work with the normal intestinal mucosal lining. Hydrogogue effect helps bring water into the intestines.
- **Apple Fiber** – Contains high amounts of pectin, rich source of soluble fiber, improves intestinal environment and has prebiotic qualities that support beneficial bacterial species.
- **Flax** – Has soluble and insoluble fibers which support the body's innate purification activities by its mucilage/ fiber that is frequently cited as helping bowel motility and waste removal processes. Supports the intestinal microbiome.
- **Bacillus Coagulans** – a probiotic bacteria with marvelous "staying power" to take up residence in the intestines. Communicates with enterocytes for optimal permeability thus helping maintain normal intestinal tissue integrity.

- **Dandelion** – A traditional liver tonic. Supports the body's normal kidney and liver processes, especially their normal purification responsibilities. Supports numerous natural eliminative pathways – skin, gall bladder, kidneys, and liver.

▼ CONTRAINDICATIONS

Do not take at the same time as nutritional (mineral) supplementation or with prescription medications to avoid binding with those elements and molecules. Good practice to take by itself, before bed.

▼ CLINICIAN CONSENSUS

- Intestinal Purification Support:
#404 BIND - Toxin Elimination
#14 C - Colon
#467 ZGlutn - Gluten Control
#697 LGUT - Leaky Gut

▼ BACKGROUND

Dr. Dan Pompa, a torchbearer nutritionally supporting the cells' normal purification processes where glutathione facilitates cells to remove acquired heavy metals and chemicals: plus super-activated carbon to catch the expelled metals/chemicals that are released into the intestines via the gall bladder preventing resorption, brought the concept to Dr. Shayne Morris to develop the state of the art IDS System. Once BIND became available, practitioners soon found many uses for super-activated carbon in clinical practice, making BIND a product in demand.

▼ SYNERGISTIC CONSIDERATIONS

- **#433 GCEL** - Intracellular Glutathione
- **#941 Brain Phase**
- **#14 C** - Colon
- **#102/#1102/#2002 ACX** - Vitamin DTX
- **#131 FBR** - Fibers for Intestinal Health
- **#940 Body Phase**
- **#697 LGUT** - Leaky Gut
- **#4/#1004/#2004 FungDx**
