Metabolism

Gt – Thymus is a precision-crafted immune support formula designed to nourish the thymus, the master regulator of your body's immune defenses. This powerful daily supplement delivers targeted nutritional support to strengthen T-cell and lymphocyte activity, the immune system's frontline warriors. By promoting immune adaptability and resilience, Gt – Thymus helps maintain optimal immune function, especially during times of increased vulnerability. With its focus on cellular renewal and systemic balance, this formula supports the very foundation of your immune health at every stage of life.

Health Indications

- Supports Immune Balance by Promoting Healthy T-Cell and Lymphocyte Activity
- Enhances Immune Resilience During Seasonal Changes and Times of Increased Demand
- Aids Recovery and Rebalancing Following Acute Immune Challenges
- Contributes to Long-Term Vitality by Supporting Thymus and Lymphatic Health
- Helps Maintain Cellular Immune Response and Adaptive Immunity at Any Age

Instructions

Take 1 capsule daily, or as directed by your health care professional.

Key Ingredients

Basil

Basil (*Ocimum basilicum*) is a phytochemical-rich herb with active compounds like eugenol, linalool, and rosmarinic acid, known for antimicrobial, anti-inflammatory, and immunomodulatory effects. These constituents modulate pro-inflammatory cytokines and support macrophage and lymphocyte activity. By enhancing innate and adaptive immune responses, basil promotes a balanced immune environment and supports resilience against external challenges.

Gentian

Gentian (*Gentiana lutea*) is a traditional bitter herb known for its liver-supportive and immune-balancing properties. Its bioactive compounds, including iridoids and secoiridoid glycosides, help stimulate bile flow, activate detoxification pathways, and support mucosal integrity, particularly in the sinuses and gastrointestinal tract. These actions help regulate inflammatory signaling and create a stable internal environment for sustained immune resilience.

Goldenseal

Goldenseal (*Hydrastis canadensis*) contains potent alkaloids like berberine and hydrastine, known for broad-spectrum antimicrobial and anti-inflammatory effects. These bioactive compounds modulate pro-inflammatory cytokines, support gut health by maintaining microbial balance, and enhance macrophage activity. Together, they promote a regulated immune response and strengthen the body's natural defenses against infection and inflammation.

Leptoetaenia Oil

Leptoetaenia oil, derived from *Lomatium dissectum*, has a long history of use in supporting the body during viral and microbial challenges. Its unique phytochemistry of coumarins, flavonoids, terpenoids, and other complex compounds, promotes healthy cytokine signaling and activates key immune cells. Unlike many antimicrobials, it maintains microbial balance without harming beneficial flora, helping sustain immune readiness and overall immune harmony.

Thymus and Spleen RNA/DNA Tissue Factors

Thymus and Spleen RNA/DNA Tissue Factors provide foundational nucleic acids that nourish and support the structure and function of these key immune organs. By reinforcing cellular communication and promoting the development of T and B lymphocytes, these tissue factors help sustain coordinated immune activity and strengthen the body's ability to respond effectively to internal and external stressors.

Warnings/Contraindications

When used as directed there are no known contraindications for Gt – Thymus.

It is always recommended that you consult your practitioner prior to adding any new supplement to your regimen if you are pregnant, breastfeeding, experiencing renal failure, undergoing an organ transplant(s), managing diabetes with insulin, or are taking medication(s) for any pre-existing conditions.

Safety

All ingredients are tested before use for:

- Pathogenic microbial contaminants
- Heavy metals and/or chemical contaminants
- Purity

Additional Information

- Gluten Free
- Vegan
- Non-GMO
- cGMP Facility
