Lung

Immunity

Whole Body

Cardio

KEY INDICATIONS

- Recurrent bronchitis or upper respiratory infections
- Persistent cough with mucus production
- Post-viral lung irritation or lingering cough
- Asthma or reactive airway episodes
- Environmental lung irritation (pollution, smoke, occupational exposure)
- Chronic sinus-bronchial drainage patterns
- Impaired mucus clearance or thick respiratory secretions
- Recovery support following respiratory infections

HOW IT WORKS

Respiratory health depends on coordinated immune defense, mucosal integrity, and efficient oxygen exchange within lung tissues. R – Lung supports these processes by promoting balanced respiratory immune activity, supporting mucosal defense systems, and assisting tissue repair following irritation or infection. By supporting cellular communication and nutrient utilization within pulmonary tissues, the formula helps maintain healthy respiratory resilience, mucus balance, and efficient oxygen exchange during environmental or microbial stress.

CLINICAL PEARLS

- Pair with **3 – Bactrex** during respiratory infections such as bronchitis or sinus patterns.
- Combine with **DetoxiGenic** when environmental toxins or pollution affect lung function.
- Useful during recovery from post-viral cough, asthma, or allergic airway irritation.
- Use therapeutic dosing during acute infections, bronchitis, or persistent cough. Liquid alternative: **CXR – Lung** concentrated extract.

SUPPLEMENT FACTS

Serving Size: 1 capsule Servings: 60

	Amount Per Serving	%DV
Proprietary Blend	415 mg	*
Goldenseal (Root); RNA/DNA Lung Tissue Factors (Bovine); Urea; RNA/DNA Pancreatin Tissue Factors (Porcine); RNA/DNA Thymus Tissue Factors (Bovine); L-Lysine HCl; L-Aspartic Acid; Gentian (Root); Allantoin; Tayuya (Root); Aloe Vera (Leaves); Lungwort (Herb Extract);		

*Daily Value not established.

Other Ingredients: Dextrose (Organic Grape), Gelatin, and Leucine.

KEY INGREDIENTS & BENEFITS

Goldenseal (Root), Gentian (Root), Tayuya (Root), Lungwort (Herb Extract), Aloe Vera (Leaves): Support respiratory mucosal integrity, microbial balance, and appropriate inflammatory signaling within lung tissue. These botanicals help maintain healthy mucus production and consistency while supporting the body's response to microbial and environmental stressors affecting the respiratory tract.

RNA/DNA Lung Tissue Factors (Bovine), RNA/DNA Pancreatin Tissue Factors (Porcine), RNA/DNA Thymus Tissue Factors (Bovine): Provide targeted nucleoprotein support to promote cellular communication, immune coordination, and tissue repair within pulmonary and immune structures. These factors help reinforce tissue-specific resilience and recovery following irritation or infection.

L-Lysine HCl, L-Aspartic Acid: Supply key amino acids required for protein synthesis, tissue repair, and maintenance of respiratory structure and function.

Allantoin, Urea: Support epithelial repair, hydration, and restoration of mucosal surfaces within irritated or compromised respiratory tissues.

INSTRUCTIONS

Maintenance dose: 1 capsule twice daily with or without food

Therapeutic dose: 2 capsules twice daily with or without food

ALLERGEN & DIETARY INFO

- cGMP Facility
- Non-GMO

SAFETY & CONTRAINDICATIONS

- Contains bovine and porcine-derived ingredients and may not be suitable for vegetarians
- Use caution during pregnancy due to goldenseal and immune-active botanicals.
- Generally considered compatible with breastfeeding at typical doses, but consult a healthcare professional before use.
