

CellGenic

Comprehensive Cellular Membrane Support

Cardio

Brain

Hormone

Metabolism

KEY INDICATIONS

- Memory lapses, difficulty concentrating
- Brain fog, age-related cognitive decline, fatigue, low mental clarity, decreased focus, and poor neurotransmitter balance
- High cholesterol, elevated LDL, poor circulation, arterial stiffness
- Insulin resistance or difficulty maintaining healthy weight
- Chronic fatigue, low endurance, poor exercise recovery
- Systemic inflammation, oxidative stress
- Overall cellular resilience, healthy membrane function

HOW IT WORKS

CellGenic supports cellular membrane integrity, regeneration, and overall metabolic function. Its blend of phospholipids, lipid antioxidants, and essential fatty acids enhances membrane fluidity, allowing efficient transport of nutrients, hormones, and signaling molecules. This improves energy production, cellular communication, and detoxification. CellGenic also supports cardiovascular and cognitive health while promoting healthy cholesterol balance. By influencing key pathways such as PPAR and AMPK, it helps optimize metabolism, reduce oxidative stress, and support long-term cellular resilience and vitality.

CLINICAL PEARLS

- Pair with **NeuroGenic** to enhance focus and clarity as this formula provides the substrates that support the nootropic compounds.
- Pair with **EnerGenic** for mitochondrial support and **ElectroGenic** to improve energy, endurance and recovery.
- Recommend therapeutic dosing when oxidative stress and toxic burden are elevated, and deeper cellular support is needed.

SYSTEMIC FORMULAS INC

ALIMENTUM LABS

SUPPLEMENT FACTS

Serving Size: 4 softgels
Servings Per Container: 30

	Amount Per Serving	%DV
Vitamin E (d- α -tocopherol) (Sunflower)	22mg	147%
Beta-Sitosterol	50mg	*
Inositol	56mg	*
Octacosanol	30mg	*
Mediator® (Phosphatidic Acid)	50mg	*

Cell Protection	1425mg	*
Lecithin Oil (Sunflower); Ahiflower Oil; Black Currant Seed Oil (Stearidonic Acid); Alpha-GPC (Glyceryl-phosphorylcholine); Candelilla Wax (<i>Euphorbia cerifera</i>); Beetroot Juice Powder; Pentadecanoic Acid; Nervonic Acid; Sea Buckthorn Seed Oil; Rosemary Extract		

*Daily Value not established.

Other Ingredients: Hydroxypropyl Starch, Glycerin, Carrageenan, Sorbitol, and Carob Powder.

KEY INGREDIENTS & BENEFITS

Mediator® Phosphatidic Acid, Alpha-GPC, Lecithin Oil, Pentadecanoic Acid, Nervonic Acid: Builds and repairs cell membranes, improving flexibility, cell function and performance, especially in brain and nerve tissue.

Ahiflower Oil, Black Currant Seed Oil, Sea Buckthorn Seed Oil: Strengthens cell membranes with key fatty acids, helps improve HDL/LDL balance and triglycerides, and calms inflammation pathways, supporting better circulation, improved metabolism, and cardiovascular performance.

Beta-Sitosterol, Octacosanol: Reduces cholesterol absorption in the gut and regulate cholesterol production in the liver, leading to improved LDL and triglyceride levels.

Vitamin E, Rosemary Extract, Beetroot Juice Powder: Helps prevent damage to fats in cell membranes and blood vessels, while increasing nitric oxide to improve blood flow and circulation.

Inositol: Supports insulin sensitivity, glucose metabolism, and cellular function

Candelilla Wax: Supports stability and delivery of fat-soluble compounds

INSTRUCTIONS

Maintenance dose: 2 softgels twice daily with or without food

Therapeutic dose: 2 softgels three times daily with or without food

ALLERGEN & DIETARY INFO

- cGMP Facility
- Vegan
- Dairy Free
- Gluten Free
- No Sugar
- Non-GMO

SAFETY & CONTRAINDICATIONS

- Can be used during pregnancy and lactation under practitioner guidance to support nutrient transport and maternal and fetal cellular health.
- For pediatric patients, apply weight-based dosing principles (Clark's Rule) and initiate at a reduced dose. Titrate gradually based on individual tolerance and therapeutic response.
- Anticoagulant risk is minimal at standard dosing; monitor only when used alongside blood-thinning medications or high-dose omega-3s.
- Fat-based ingredients may require adequate bile flow; use caution in patients with gallbladder dysfunction or fat intolerance.
