

# DV3

## Vitamin D3 + Immune Support

Immunity

Metabolism

Cardio

## KEY INDICATIONS

- Indoor living with minimal exposure to direct sunshine on skin
- Less than optimal vitamin D levels
- Frequent infections or poor immune resilience
- Autoimmune or inflammatory conditions
- Bone loss, osteopenia, or fracture risk
- Muscle weakness, aches, or poor physical performance
- Mood changes or seasonal affective disorder
- Cardiovascular risk or metabolic syndrome patterns

## HOW IT WORKS

Not your average vitamin D product, DV3 focuses on restoring the body's ability to properly absorb, convert, and respond to fat-soluble vitamins at the cellular level. By supporting liver and kidney pathways involved in vitamin D activation, the formula helps promote production of active vitamin D metabolites that regulate calcium balance, immune signaling, and gene expression. Synergistic cofactors reinforce membrane stability and mineral transport, creating a stronger physiological foundation for resilient metabolism, tissue maintenance, and coordinated cellular communication.

## CLINICAL PEARLS

- For sensitive patients dose early in day, due to immune and metabolic activation.
- Consider **VITD3 LQ** for children or those unable to swallow capsules.
- Pair with **MIN** if detox symptoms persist to support clearance.
- Therapeutic dosing when serum vitamin D is below 50 ng/mL; resume maintenance once achieved.

## SUPPLEMENT FACTS

Serving Size: 1 capsule      Servings: 60

	Amount Per Serving	%DV
Vit A (Retinyl Acetate)	892mcg RAE	99%
Vit C (Magnesium Ascorbate)	3.8mg	4%
Vit D3	108mcg	540%
Vit E (D- $\alpha$ -Tocopheryl Succinate)	20mg	133%
Vit K2 MK-7	85mcg	71%
Calcium (Carbonate)	51mg	4%
Magnesium (Oxide)	65mg	15%
Zinc (Chelate)	5.1mg	46%
Potassium (Bitartrate)	3.1mg	<1%

Proprietary Blend 190mg \*

Rose Hips (Hb); Celandine (Hb); Beta Glucan; Turmeric; RNA/DNA Liver Tissue Factors (Bovine); RNA/DNA Kidney Tissue Factors (Bovine); L-Carnitine; Grape Seed (Ext); Citrus Bioflavonoids; Kamala (Hb); Cleavers (Hb)

\*Daily Value not established.

Other Ingredients: Gelatin, Vegetable Stearate, Silica, and Leucine.

## KEY INGREDIENTS & BENEFITS

**Vitamins A, D3, E, K2 MK-7, Calcium:** Support epithelial integrity, immune modulation, membrane protection, and calcium utilization while promoting cellular signaling, antioxidant defense, and tissue stability.

**Vitamin C, Turmeric, Grape Seed Extract, Citrus Bioflavonoids, Rose Hips:** Provide antioxidant and anti-inflammatory support, promoting collagen formation, immune signaling, and protection against oxidative tissue stress.

**Magnesium, Zinc and Potassium:** Support immune repair, neuromuscular signaling, energy metabolism, and electrical balance for healthy cellular function.

**Liver and Kidney RNA/DNA Tissue Factors:** Reflects a trophic support approach, providing biological signaling elements that support cellular repair, adaptation, and organ resilience under stress.

**Cleavers, Celandine, Kamala:** Provide botanical support for lymphatic flow, detoxification pathways, and metabolic cleansing.

**Beta Glucan:** Supports healthy immune communication by helping prime innate immune cells, promoting balanced immune readiness without overstimulation.

**L-Carnitine:** Supports mitochondrial energy metabolism and fatty-acid transport, reinforcing cellular energy production during detoxification and metabolic demand.

## INSTRUCTIONS

Maintenance dose: 1 capsule daily with food

Therapeutic dose: 1 capsule 2 times daily with food

## ALLERGEN & DIETARY INFO

- cGMP Facility
- Non-GMO

## SAFETY & CONTRAINDICATIONS

- Contains essential nutrients that may be supportive during pregnancy and lactation; however, total vitamin A intake and botanical ingredients should be reviewed for individual appropriateness.
- Individuals with sensitivities to bovine-derived ingredients or botanicals should review ingredients carefully prior to use.
- Provides a high-potency dose of vitamin D3. Individuals using additional vitamin D or with conditions affecting calcium metabolism should monitor vitamin D status.
- Contains vitamin K2 (MK-7), monitor labs if using blood-thinning medications.
- Individuals with known sensitivities to bovine products, botanicals, or digestive acids should review ingredients carefully.
