

# 5

## Stabilizer

Hormone

Brain

Metabolism

## KEY INDICATIONS

- Delayed recovery or prolonged healing following illness, infection, or stress
- Signs of oxidative stress (fatigue, poor recovery, accelerated aging appearance)
- History of environmental or chemical exposure with reduced resilience
- Persistent inflammation without clear acute driver
- Cognitive decline or instability associated with chronic stress or aging
- Compromised gut integrity with slow or incomplete mucosal repair
- Tissue fragility (skin, connective tissue, or barrier systems)
- Recovery phase following intensive detoxification or antimicrobial protocols

## HOW IT WORKS

5 – Stabilizer supports cellular replication stability and tissue resilience by reinforcing RNA/DNA signaling integrity and antioxidant protection. It provides targeted neuroendocrine tissue factors alongside redox-active vitamins and structural nutrients that support membrane integrity, extracellular matrix stability, and regenerative signaling. By strengthening transcriptional coordination and mitigating oxidative stress, it promotes balanced cellular renewal and physiologic stability during high-demand or recovery states.

## CLINICAL PEARLS

- Incorporate early in recovery with tissue-support formulas to improve repair responsiveness.
- Combine with **ROX** during elevated oxidative stress to support antioxidant balance.
- Use with **EnerGenic** in aging/recovery protocols requiring metabolic resilience.
- Therapeutic dosing recommended during periods of tissue repair or oxidative stress; liquid option: **CX5 – Stabilizer**.

## SUPPLEMENT FACTS

Serving Size: 3 capsules Servings: 10

	Amount Per Serving	%DV
Vit C (Magnesium Ascorbate)	180mg	200%
Vit D3 (Cholecalciferol)	31.25mcg	156%
Vit E (d- $\alpha$ -tocopheryl succinate)	26.8mg	179%
Vit K1	40mcg	33%
Niacin	15mg	94%
Magnesium (Ascorbate, Epsom Salt)	16mg	4%

Proprietary Blend	1130mg	*
RNA/DNA Hypothalamus Tissue Factors (Bovine); Rose Hips (Herb); Sterilized (non-germinating) Yeast; Yucca (Root); Resistant Maltodextrin; Bone Broth (Beef); L-Histidine HCl; RNA/DNA Brain Tissue Factors (Porcine); Potassium Bitartrate; Green Lipped Mussel (Shellfish); Allantoin; L-Alanine		

\*Daily Value not established.

Other Ingredients: Gelatin and Leucine

K/25

## KEY INGREDIENTS & BENEFITS

**Vitamin C (Magnesium Ascorbate), Vitamin D3 (Cholecalciferol), Vitamin E (d- $\alpha$ -tocopheryl succinate), Vitamin K1, Niacin, Magnesium (Ascorbate, Epsom Salt), Rose Hips (Herb):** Provide antioxidant nutrients and cofactors that support redox balance, immune coordination, and membrane stability. These nutrients help protect cells from oxidative damage while supporting metabolic signaling required for tissue resilience and cellular renewal.

**RNA/DNA Hypothalamus Tissue Factors (Bovine), RNA/DNA Brain Tissue Factors (Porcine), Potassium Bitartrate:** Provide glandular nucleoprotein substrates traditionally used to support neuroendocrine communication and transcriptional stability. These ingredients help reinforce coordinated signaling within central regulatory tissues involved in metabolic regulation and cellular replication.

**Bone Broth (Beef), Green-Lipped Mussel (Shellfish), Allantoin, L-Histidine HCl, L-Alanine, L-Leucine:** Provide structural peptides and amino acids that support extracellular matrix stability, collagen formation, and tissue repair during periods of stress or recovery.

**Sterilized Yeast (Non-Germinating), Yucca Root, Resistant Maltodextrin:** Support nutrient delivery, metabolic buffering, and prebiotic balance that helps sustain systemic repair processes.

## INSTRUCTIONS

Maintenance dose: 1 capsule daily with meals

Therapeutic dose: 2 capsules twice daily with meals

## ALLERGEN & DIETARY INFO

- cGMP Facility
- Gluten Free
- Contains Shellfish (Green-Lipped Mussel)
- Non-GMO

## SAFETY & CONTRAINDICATIONS

- Use during pregnancy under practitioner supervision due to inclusion of tissue factors and botanicals lacking pregnancy-specific safety data.
- Generally well tolerated during lactation in healthy individuals.
- Contains shellfish (green-lipped mussel) and should be used with caution or avoided in individuals with shellfish allergy.
- This formula contains bovine and porcine-derived glandular tissue factors; inappropriate for vegan, vegetarian, Halal, or Kosher diets.
- Consult a healthcare practitioner prior to use if taking blood-thinning medications due to vitamin K1 content.
