

CXVIVI

Virox Concentrated Extract

Immunity

Detox

Gut

KEY INDICATIONS

- Early viral illness with fatigue, fever, or body aches
- Respiratory viral infections with cough, sore throat, or congestion
- Lingering fatigue or slow recovery after viral illness
- High exposure environments (travel, schools, healthcare settings)
- Seasonal viral circulation support (winter immune protocols)
- Mixed microbial imbalance involving viral and fungal organisms
- Immune stress following illness or prolonged infection
- General immune resilience, impaired absorption or inability to swallow capsules

HOW IT WORKS

CXVIVI is the concentrated liquid extract of VIVI designed to support immune defenses during viral and microbial stress. The formula promotes effective immune surveillance and helps the body recognize and respond to pathogenic challenges. It supports cellular membrane stability and tissue resilience during immune activation while helping maintain balanced inflammatory signaling. By supporting immune communication and recovery processes, the formula helps maintain respiratory and systemic immune readiness during periods of heightened microbial exposure.

CLINICAL PEARLS

- Use therapeutic dosing at onset of viral symptoms or when illness is actively progressing.
- Pair with **3 - Bactrex** for bacterial co-infection or sinus-lung involvement.
- Combine with **ImmuneGenic** for enhanced immune signaling during acute infection.
- Alternative formula: **VIVI** capsules.

SUPPLEMENT FACTS

Ingredients: H₂O;
Ethanol; **Extracts of:**
Dextrose (Organic
Grape); Pau D'Arco
(Bark), Leucine;
Leptotaenia Oil; Jojoba
Oil; Bitter Almond Oil
(Tree Nut); Vitamin E

E/24

INSTRUCTIONS

Maintenance dose:

Adults: 2–6 drops orally 2–3 times daily

Children (ages 1–6): 1–3 drops orally, up
to 3 times daily

Therapeutic dose

Adults: 6 drops 4–6 times daily

ALLERGEN & DIETARY INFO

- cGMP Facility
- Non-GMO

KEY INGREDIENTS & BENEFITS

Pau D'Arco (Bark): Provides naphthoquinone compounds used to support microbial balance involving fungal and bacterial organisms while supporting immune surveillance. It also modulates inflammatory signaling and helps maintain microbial equilibrium during periods of immune stress.

Leptotaenia Oil: Supplies botanical compounds historically used to support immune response during viral illness and respiratory microbial exposure. It supports immune recognition and response while promoting resilience during acute viral challenges.

Vitamin E: Provides antioxidant protection that helps stabilize cellular membranes, protect tissues during immune activation, and reduce oxidative stress associated with infection and inflammation.

Jojoba Oil, Bitter Almond Oil (Tree Nut): Provide lipid carriers that disperse fat-soluble phytochemicals, supporting absorption, tissue delivery, and cellular membrane integration of active compounds.

Dextrose (Organic Grape), Leucine: Support energy delivery and amino acid availability required for cellular repair, metabolic function, and recovery during immune activation.

Water, Ethanol: Support extraction, preservation, and stability of active botanical constituents.

SAFETY & CONTRAINDICATIONS

- Individuals with nut allergies should use caution due to the presence of bitter almond oil.
- Not recommended during pregnancy or breastfeeding unless directed by a qualified healthcare professional.
- Temporary rash, redness, or itching may occur when first using Leptotaenia (*Lomatium dissectum*). This is generally harmless and typically resolves after discontinuing use.
