

EpiGenic

Epigenetic Longevity Support

Whole Body

Immunity

Metabolism

Detox

KEY INDICATIONS

- Chronic inflammation
- Cognitive decline or brain fog
- Impaired recovery or healing
- Low energy or fatigue with aging
- Muscle loss or reduced strength
- Immune decline
- Dyslipidemia
- Insulin resistance or impaired glucose control

HOW IT WORKS

EpiGenic supports healthy aging by promoting the clearance of senescent cells, reducing inflammation, and enhancing tissue renewal. It modulates epigenetic pathways by influencing which genes are turned on or off, while activating longevity proteins that support DNA repair, energy production, and stress resistance. This formula also supports autophagy and mitochondrial integrity while limiting ROS damage to DNA, proteins, and cell membranes, so that cells function more efficiently, recover faster, and better withstand stress over time.

CLINICAL PEARLS

- Pair with **BindGenic** & **DetoxiGenic** to support clearance of senescent cell turnover.
- Pair with **EnerGenic** when fatigue, low ATP, or mitochondrial dysfunction is prominent to enhance energy production and cellular repair.
- Therapeutic dosing recommended during periods of inflammation, accelerated aging, or cellular stress; for 8–12 weeks. Transition to maintenance once improved.

SUPPLEMENT FACTS

	Amount Per Serving	%DV
Serving Size: 2 capsules		Servings: 30
Forskolin	25 mg	*
Quercetin	200 mg	*
ButyraGen® (Tributyryn Complex)	200 mg	*
Uridine 5'-monophosphate	100 mg	*
Fisetin	30 mg	*
Ergothioneine	10 mg	*
Spermidine	3.5 mg	*
Epigenetic Support Blend	350 mg	*
Alpha-ketoglutarate (AKG)		
Chamomile Extract (Apigenin)		

*Daily Value not established.

Other Ingredients: Cellulose, Leucine, Potato Starch, Organic Rice Extract, and Organic Rice Fiber.

ButyraGen® is a registered trademark of NutriScience Innovations, LLC.

KEY INGREDIENTS & BENEFITS

Fisetin, Quercetin, Chamomile Extract (Apigenin), Alpha-Ketoglutarate, ButyraGen®: Support senescent cell clearance pathways, reduce chronic inflammation, and promote healthy gene expression. These compounds influence sirtuins and histone signaling, helping regulate inflammatory output, support DNA repair, and enhance mitochondrial function during cellular renewal. Alpha-ketoglutarate also supports energy production and cellular repair processes.

Spermidine, Uridine 5'-Monophosphate, Forskolin, Leucine: Support autophagy, protein synthesis, and cellular repair. Help maintain muscle mass, support tissue regeneration, and improve cellular response to stress and energy demands. Uridine supports cognitive function and membrane integrity, while forskolin promotes cAMP activity to support metabolic and intracellular signaling.

ButyraGen®, Ergothioneine: Support gut lining integrity and provide intracellular antioxidant protection against reactive oxygen species (ROS). Help protect mitochondria, maintain cellular stability, and support efficient turnover of damaged cells.

INSTRUCTIONS

Maintenance dose: 2 capsules daily with food

Therapeutic dose: 2 capsules twice daily with food

ALLERGEN & DIETARY INFO

- cGMP Facility
- Dairy Free
- Non-GMO
- Gluten Free
- Vegan
- No Sugar

SAFETY & CONTRAINDICATIONS

- Generally considered safe during pregnancy and lactation; use under the guidance of a qualified healthcare practitioner due to its concentrated bioactive compounds.
- Appropriate for pediatric use under professional supervision; dosing should be individualized based on age, weight, and clinical presentation.
