

# K

## Kidney

Detox

Hormone

Whole Body

## KEY INDICATIONS

- Reduced kidney resilience or functional decline
- Impaired filtration (elevated BUN/creatinine patterns)
- Low urine output not due to obstruction
- Electrolyte imbalance related to kidney function
- Blood pressure patterns linked to renal regulation
- Low back discomfort associated with kidney strain
- Toxin accumulation due to reduced renal clearance
- Foundational support in kidney-focused protocols

## HOW IT WORKS

K – Kidney supports renal filtration by nourishing nephron structure and function. It enhances the kidney's ability to process metabolic waste, regulate electrolyte balance, and maintain fluid equilibrium. By supporting kidney–adrenal communication and cellular integrity, it improves overall filtration efficiency and resilience without directly targeting urinary flow or fluid mobilization making this the ideal choice when filtration markers or kidney function are impaired.

## CLINICAL PEARLS

- Add **Ks – Kidney S** when urinary flow or voiding is inconsistent.
- Add **KDIR** when fluid retention presents as swelling or edema.
- Use **CXK – Kidney** when liquid delivery or enhanced absorption is preferred.
- Therapeutic dosing recommended during fluid retention, low urine output, or elevated BUN/creatinine patterns. Resume maintenance for ongoing support.

## SUPPLEMENT FACTS

Serving Size: 2 capsules      Servings: 30

	Amount Per Serving	%DV
Vit C (Calcium Ascorbate)	90 mg	100%
Calcium (Ascorbate, Carbonate)	37 mg	3%

Proprietary Blend	945 mg	*
RNA/DNA Kidney Tissue Factors (Bovine); Rose Hips (Herb); Gelatin; Magnesium Sulfate; Cha De Bugre (Leaves); Fish Liver Oil; Sete Sangrias (Herb); Buchu (Leaves); Juniper Berries; RNA/DNA Adrenal Tissue Factors (Bovine); Hesperidin; Cleavers (Herb); L-Serine; RNA/DNA Thalamus Tissue Factors (Bovine); L-Phenylalanine; Allantoin; Rose Oil; L-Tyrosine; Spearmint Oil; Aloe Vera; Sodium Copper Chlorophyll		

\*Daily Value not established.

Other Ingredients: Gelatin, Leucine, and  
Dextrose (Organic Grape).      D/26A

## KEY INGREDIENTS & BENEFITS

**Vitamin C, Calcium, Magnesium, Hesperidin:** Support antioxidant protection, collagen formation, vascular integrity, and mineral balance important for renal tissue health.

**RNA/DNA Kidney Tissue Factors (Bovine), RNA/DNA Adrenal Tissue Factors (Bovine), RNA/DNA Thalamus Tissue Factors (Bovine):** Provide nucleic acids and peptides that help repair tissue and support normal cell function and coordination between the kidneys and adrenals.

**Cha De Bugre, Buchu, Juniper Berries, Cleavers, Sete Sangrias, Spearmint Oil:** Support urinary flow, fluid movement, and waste clearance while helping maintain healthy inflammation levels.

**Gelatin, L-Serine, L-Phenylalanine, L-Tyrosine:** Provide amino acids that support tissue structure, repair, and assist communication between the kidneys and adrenals.

**Rose Hips, Fish Liver Oil, Allantoin, Aloe Vera, Rose Oil, Sodium Copper Chlorophyll:** Support antioxidant protection, soothe kidney and urinary tract tissues, stabilize cell membranes, and assist natural detox processes.

## ALLERGEN & DIETARY INFO

- cGMP Facility
- Non-GMO
- Gluten Free
- Contains Fish (Fish Liver Oil)

## INSTRUCTIONS

Maintenance dose: 1 capsule twice daily with food

Therapeutic dose: 2 capsules twice daily with food for 4–8 weeks, depending on severity and clinical response

## SAFETY & CONTRAINDICATIONS

- Contraindicated in individuals with phenylketonuria (PKU) due to the presence of L-phenylalanine.
- During pregnancy and lactation, use only under the guidance of a qualified healthcare practitioner due to the inclusion of glandulars and active botanical compounds.
- Appropriate for pediatric use under professional supervision; dosing should be individualized based on age, tolerance, and clinical presentation. Consider CXK – Kidney liquid when a child-friendly option is needed.
- Contains bovine and fish-derived ingredients; not appropriate for individuals avoiding animal products.
- Avoid use in individuals with active severe renal inflammation or acute kidney failure unless strictly monitored.
