

VIVI

Virox

Immunity

Detox

Gut

KEY INDICATIONS

- Early viral illness with fatigue, fever, or body aches
- Respiratory viral infections with cough, sore throat, or congestion
- Lingering fatigue or slow recovery after viral illness
- High exposure environments (travel, schools, healthcare settings)
- Seasonal viral circulation support (winter immune protocols)
- Mixed microbial imbalance involving viral and fungal organisms
- Immune stress following illness or prolonged infection
- General immune resilience

HOW IT WORKS

VIVI is designed to support immune defenses during viral and microbial stress. This formula promotes effective immune surveillance and helps the body recognize and respond to pathogenic challenges. It supports cellular membrane stability and tissue resilience during immune activation while helping maintain balanced inflammatory signaling. By supporting immune communication and recovery processes, the formula helps maintain respiratory and systemic immune readiness during periods of heightened microbial exposure.

CLINICAL PEARLS

- Use therapeutic dosing at onset of viral symptoms or when illness is actively progressing.
- Pair with **3 – Bactrex** for bacterial co-infection or sinus–lung involvement.
- Combine with **ImmuneGenic** for enhanced immune signaling during acute infection.
- Alternative formula: **CXVIVI** – liquid extract.

SYSTEMIC FORMULAS INC

SUPPLEMENT FACTS

Serving Size: 1 capsule Servings: 30

	Amount Per Serving	%DV
Vitamin E	1.7 mg	11%
Proprietary Blend	150 mg	*
Pau D'Arco (Bark)		
Leptotaenia Oil		
Bitter Almond Oil (Tree Nut)		
Jojoba Oil		

*Daily Value not established.

Other Ingredients: Dextrose (Organic Grape),
Cellulose, and Leucine. H/23

KEY INGREDIENTS & BENEFITS

Pau D'Arco (Bark): Provides naphthoquinone compounds used to support microbial balance involving fungal and bacterial organisms while supporting immune surveillance. It also modulates inflammatory signaling and helps maintain microbial equilibrium during periods of immune stress.

Leptotaenia Oil: Supplies botanical compounds historically used to support immune response during viral illness and respiratory microbial exposure. It supports immune recognition and response while promoting resilience during acute viral challenges.

Vitamin E: Provides antioxidant protection that helps stabilize cellular membranes, protect tissues during immune activation, and reduce oxidative stress associated with infection and inflammation.

Jojoba Oil, Bitter Almond Oil (Tree Nut): Provide lipid carriers that disperse fat-soluble phytochemicals, supporting absorption, tissue delivery, and cellular membrane integration of active compounds.

INSTRUCTIONS

Maintenance dose: 1 capsule daily

Therapeutic dose: 1 capsule three times daily

ALLERGEN & DIETARY INFO

- cGMP Facility
- Non-GMO

SAFETY & CONTRAINDICATIONS

- Individuals with nut allergies should use caution due to the presence of bitter almond oil.
- Not recommended during pregnancy or breastfeeding unless directed by a qualified healthcare professional.
- A small percentage of individuals may experience a temporary rash, redness, or itching which may occur when first using Leptotaenia (*Lomatium dissectum*). This is generally harmless and typically resolves after discontinuing use.
