

# VRM3

## Micro

Immunity

Detox

Gut

## KEY INDICATIONS

- Suspicion of microscopic parasitic organisms (protozoa, spirochetes, microbial parasites)
- Digestive symptoms following contaminated water, travel, or foodborne exposure
- Persistent bloating, loose stools, or intestinal irritation associated with protozoal organisms
- Microbial or protozoal imbalance not consistent with visible intestinal worms
- Support during cleansing protocols targeting microscopic pathogens
- Support for intestinal immune defense during microbial challenges
- Support during microbiome restoration following protozoal disruption
- Maintenance of intestinal mucosal resilience

## HOW IT WORKS

VRM3 is a botanical formula designed to support the body's natural defenses against microscopic parasitic and microbial organisms within the gastrointestinal tract. The formula combines traditional antiparasitic botanicals, digestive enzyme support, and mucosal-soothing herbs that help create an intestinal environment less favorable to pathogenic organisms while supporting breakdown, transit, and elimination through normal bowel function.

## CLINICAL PEARLS

- Use therapeutic dosing during active symptoms such as loose stools, bloating, or post-travel GI disruption. Historically useful for *Blastocystis hominins* and giardiasis.
- Pair with **Clear 1 μBiomic** and **Clear 2 μBiomic** for microbial protocols.
- Combine with **BindGenic** and **C – Colon** to support toxin binding and elimination.
- Alternative formula: **CXVRM3** – liquid extract.

## SUPPLEMENT FACTS

Serving Size: 1 capsule Servings: 30

	Amount Per Serving	%DV
Proprietary Blend	490 mg	*
Citrus Bioflavonoids; Black Walnut (Leaves); Kamala (Herb); Maracuja (Leaves); Sweet Wormwood (Herb); Erva Tostao (Root); Valerian (Root); Wild Geranium (Root); Bistort (Herb); Anise (Herb); Pomegranate (Fruit); Wormseed Oil; Jalapa (Root); Yerba Santa (Herb); Bromelain		

\*Daily Value not established.

Other Ingredients: Cellulose and Leucine.

## KEY INGREDIENTS & BENEFITS

### Citrus Bioflavonoids, Pomegranate (Fruit), Anise (Herb):

Provide polyphenols and aromatic compounds that support intestinal antioxidant defenses and help maintain mucosal resilience while discouraging microbial imbalance within the gastrointestinal environment.

### Black Walnut (Leaves), Kamala (Herb), Sweet Wormwood (Herb), Wormseed Oil, Wild Geranium (Root), Bistort (Herb):

Provide traditional botanical compounds that support intestinal microbial balance and help create an environment unfavorable to microscopic parasitic organisms.

### Jalapa (Root), Erva Tostao (Root), Yerba Santa (Herb):

Support intestinal drainage and elimination processes by promoting bowel transit and assisting in removal of microbial debris and unwanted organisms.

**Bromelain:** Provides proteolytic activity that helps break down protein residues, inflammatory debris, and biological material that may shelter microbial organisms.

**Maracuja (Leaves), Valerian (Root):** Provide calming botanical support that helps reduce intestinal tension and support coordinated digestive motility during cleansing protocols.

## INSTRUCTIONS

Take on an empty stomach 30 minutes before meals, or as tolerated.

Maintenance dose: 1 capsule once or twice daily.

Therapeutic dose: 2–3 capsules twice daily.

## ALLERGEN & DIETARY INFO

- cGMP Facility
- Non-GMO

## SAFETY & CONTRAINDICATIONS

- Not recommended during pregnancy or lactation due to the presence of antiparasitic and botanically active compounds.
- Use caution in individuals with gastrointestinal sensitivity, as cleansing may temporarily increase symptoms such as bloating, cramping, or changes in bowel patterns.
- Monitor for detoxification reactions, including fatigue or skin responses, and adjust dosing as needed.
- Use caution in individuals with liver or kidney conditions as concentrated botanical extracts may increase metabolic burden.
- Not intended for long-term continuous use; this formula is designed for targeted, short-term use within structured cleansing protocols under practitioner guidance.
- Use caution in individuals with known allergies to tree nuts (Black Walnut) or pineapple (Bromelain Enzyme).
